

New Vans ... New Look!

In May 2019, Union City took delivery of its first new paratransit vans. The vans were purchased through a purchasing cooperative lead by CalACT (California Association for Coordinated Transportation) and MBTA (Morongo Basin Transit Authority). The Cooperative provided a Federal and California State compliant purchasing solution and offered a variety of ADA compliant vehicles from low floor minivans to large cutaway vehicles. These gasoline powered vehicles were selected to replace CNG (Compressed Natural Gas) vans that are past their useful lives. The vans were purchased with local funds and are expected to provide at least 7-10 years of service. The vans also sport a new look that maintains consistency with the City of Union City's current logo.

Measure B and BB provide over 50% of Union City Paratransit operating funds. It would not be possible to provide these valuable services if it were not for this important transportation sales tax. Measures B and BB, your tax dollars at work!
