

Union City Transit Going Electric!

Union City Transit applied for a Federal Transit Administration (FTA) Low or No Emission Vehicle competitive grant at the end of May 2021. Union City Transit staff believe this has been their best grant submittal to date for these funds and hope to hear positive news later in the summer of 2021.

If Union City Transit is successful, your Measure BB funds will assist with operating fourteen (14) thirty-five foot (35') low-floor battery electric buses in 2024. The fourteen (14) buses will represent seventy-eight percent (78%) of Union City Transit's bus fleet making it possible to provide the cleanest public transit bus option in southern Alameda County.

Union City Transit staff hopes to report good news to our riders in 2022!

Thank you for supporting public transit and thank you for riding Union City Transit!
