

New Union City Paratransit Vans and Going Electric!

Union City Paratransit took delivery of four (4) new vehicles to provide service in fall 2021.

The four (4) vehicles are all Ford Transit T-350EL vans instead of the traditional cutaway van customers are accustomed to riding. The vans allow for better access to facilities and parking lots that the traditional cutaway may not be able to access while providing seating for eight (8) customers and up to three (3) wheelchair positions.

All four (4) vehicles are similar to the customer except that three (3) are gas powered and one (1) is all-electric!

Your Measure BB funds are making the operation of these news vehicles possible. Be on the lookout for more electric vehicles to serve you in the future!

Thank you for supporting public transit and thank you for riding Union City Paratransit!
